"Silent Sanderson"

a Hunt Stromberg personally supervised production

Also a good two reel comedy

CLARESHOLM LOCAL NEWS

Invitations are out for the opening dance at the School of Agriculture.

The ladies of St. John's Guild wish to announce the date of their annual bazaar for Saturday, December 5th.

Emerson Smith has returned home to Cairo, Ontario, after spending the past six weeks in Clareholm.

The regular meeting of St. John's Guild will be held in the Parish Hall on Wednesday, Nov. 4, at the usual hour.

Harry Carey in "Silent Sanderson" at the Rex theater Friday and Saturday nights this week. This is a Hunt Stromberg personally supervised production.

The ladies of Bethel United church will hold their annual chicken pie dinner in Harrison Hall on Friday evening, Nov. 13. Admission, adults 30c, children 35c.

Services will be held in St. John's Church of England on Sunday, 1st November, at 11 a.m. and 7.30 p.m., which will be conducted by the Rev. T. B. Winter of Calgary.

Miss Mae Amundsen, R.N., has resigned as one of the nurses of the local hospital. She expects to leave for Edmonton very soon. Miss Mae will be missed very much by her many friends.

The bunk house and cook house of the Wallace & Ricks threshing outfit, north of town, caught fire last Saturday and with their contents were destroyed. The crew lost considerable clothing.

John F. Miller, eye sight specialist, of Calgary, 304 Underwood Block, will be at Queen's Hotel, Clareholm, on Wednesday, Nov. 4, better equipped than ever. Tell your neighbors. Come early.

Rev. Prof. Bancke of the Alberta Institute of the Bible, Music and Art, has after the wish of the students as well as the public, decided to remain here for another year. The orchestra will again be organized for winter work.

This week's weather variety has included nearly everything from the week end blizzard, followed by several days of zero weather, to an Indian summer chinkoo on Thursday. Several threshing outfits have come, and threshing in this district despite the inclement weather.

The third bridge party given by the Catholic ladies will be held in the Parish Hall on Monday, Nov. 2nd. There were twelve tables at the last party, October 19th, and a pleasant evening was enjoyed by all. The prizes going to Mr. Reinecke and Mr. Crammy. Playing begins sharp at 8.30. Please come in good time.

The Women's Missionary Society are holding their annual thanksgiving meeting in St. Andrew's United church on Tuesday at 3 o'clock. Miss MacLennan, who has been in China for twenty years, will give an address on her work there which should be interesting to all. Everybody welcome.

Vulcan Lodge of Elks will be instituted on Thursday, November 5th, in the Odd Fellows' hall at Vulcan. Tony McKinley, the grand organizer, has announced that he will again resume work in the Clareholm district shortly after that date. He writes that despite the unfavorable weather Vulcan will have a large number take the degree of Elksdom.

St. Andrew's Society

The annual meeting of this society will be held in the G. W. V. rooms on Saturday evening, 7th November, at 8 p.m. A full attendance of members is requested.

G. Shearer, Secretary

Friday, November 13, is the date decided upon by the Ladies' Aid for the annual Thanksgiving chicken pie dinner in Harrison Hall.

W. M. COCKBURN
Who comes from Barrie, Ontario, to take a position on the staff of the School of Agriculture.

Increasing Interest Is Taken In Great Britain In Respect To Emigration To Canada

"This century will witness a development in Canada in all ways similar and equal to the development in the United States in the 19th century," a writer in *The Outlook* writes, and adds: "In the long run, provided the present policy is maintained, of encouraging the immigration only of the Nordic races, Canada will produce a finer nation than the one in the making in the United States, where a policy of indiscriminate admission of all migrants was pursued until recently."

The same writer pleads for the encouragement of the "gentlemanly adventurer," the type of immigrant with character and a moderate capital. He deplores the fact that the young man now at home seems to be occupied mainly in dancing and games.

Poultry Industry In Alberta

Production Last Year Was Worth Three Million Dollars
Alberta's rapid expansion of mixed farming production in recent years has brought about a development of branches of farming, the most important of which is poultry raising. Three years ago this province was a heavy importer of eggs and other poultry products. In the last three years, however, it has become a net exporter. The domestic requirements, but the farmers, realizing that poultry raising was a valuable addition to their regular activities, have lately increased production to such a degree that the province produced over 2,000,000 dozen eggs of a value of \$5,756,000. In addition some 5,200,000 pounds of live and dressed poultry, worth \$3,125,000, were handled by commercial houses, making a total production for the year of \$8,196,000.

Good Friend To Man

Spiders Are Most Useful and Should Be Protected
The prodigious habits of spiders make them most useful to man. Our selfish interests should preserve and protect them, except when they are near the housewife by building dust-catching and unsightly webs indoors. Even then they might be of use. All forms are diligent producers of their kind, and were it not for their numerous enemies there would be enough spiders to silence even the fiercest of insects, and to make the over-production of noxious insects, in comparison to the insects there are few spiders, both of species and of individuals. Considering the number of eggs spiders lay and the protective care they give their eggs, this seems surprising. But when we observe the ceaseless activity of birds, shrews, toads, snakes, lizards, robberflies, certain parasitic insects and, most particularly, mud dauber and digger wasps, it is not surprising that spiders exist at all.

Canada's Greatest Asset

Only about 15 per cent. of our available wheat lands are in use. If with so small a part of our wheat acreage in use we can be the greatest wheat exporting country, what a future awaits us agriculturally when they are securing five per cent. of what our wheat lands are in cultivation? Wheat is the thing in Canada, the support of all. And the swiftest way to prosperity is by way of greater wheat production.—Toronto Star.

Footsteps From Afar

Members of the Oxford University Arctic expedition found that they could pick up the British broadcast on a four-valve set so clearly that they could hear the shuffle of the dancers' feet at the Savoy Hotel, London, approximately 2,000 miles away.

Reparations Paid

Germany's total reparations during the first year of the operation of the Dawes' plan amounted to 1,453,000,000 gold marks, or about \$281,000,000. Out of this sum the agreed general reparations paid to various allied creditors \$28,500,000 gold marks.

George: "We're men here. Pools are certain."

James: "Are you certain?"

George: "I am certain."

W. S. C. 1932

To Aid Marketing Of Produce

Dominion-Wide Commission Is Proposed At Toronto Meeting
Hon. George Hoadley, minister of agriculture for Alberta, was present at a meeting in Toronto of the Ontario agricultural committee, at which the proposal to establish a Dominion-wide commission for the marketing of Canadian foodstuffs was further considered.

The gathering was attended by representatives of several provinces, and chiefly regarding the success of foreign produce in the British market. He cited the co-operative societies of Ontario, which, he believed, in the necessity of a national commission such as was proposed, but was inclined to favor any other than those which it did, is prohibited, except under license.

Farmers To Get Surplus

Pooled Grain Will Be Handled At Lowest Possible Cost
In a notice to its 400 local sections throughout the province, the Saskatchewan Co-operative Elevator Company has stated that any surplus remaining after the costs of operation have been deducted from pooled wheat will be received by the farmers. The company points out to its sections that:

"A stated charge as a working basis is being collected from the pooling farmer, and any surplus accruing under the agreement will, of course, accrue to those from whom it was received. In a pooled grain passing through the company's elevators will be handled at the lowest cost possible, and you may assure all who are concerned that the growers delivering pooled grain through these elevators will receive the surplus remaining after deducting the cost of operation."

Many Students Will Attend

Record Enrollment Expected At Alberta Government Farms
Enrollment in the three government farm schools at Vermilion, Olds and Claresholm are likely to go far beyond those of last year, and the prospects for a record registration are said to be more than good. Applications are already coming in from all parts of the province, and improved conditions among the farmers as a result of two years good crop returns are reflected in the evident desire of farm young people to take agricultural training at the government schools.

Saskatchewan Shorthorn Club

Sale of Shorthorns at Regina Will Be Held Week of Nov. 3rd
The Saskatchewan Shorthorn Club announces a sale of Shorthorns at Regina exhibition grounds during the week of the sheep and ewe sale and sale. This will be held week of November 3rd.

The number offered for sale will be about 25 females and six bulls contributed by members of the club. Every effort is being made to get together as creditable a lot of young Shorthorn females as can be found in the province. The president, J. B. Davidson, western representative of the Dominion Shorthorn Association, and all of the best judges in the Dominion, is making the selection from among those offered by the contributors.

Saskatchewan Corn Show

Corn Crop This Year Reported To Be Uniformly Good
Arrangements are now practically completed for the third Saskatchewan corn show, which is to be held at Regina from November 13 and 14, according to a letter recently received at the field crops branch of the department of agriculture. Mr. G. D. Mathews, secretary of the Saskatchewan Corn Growers' Association. As the corn crop this year throughout the province is reported as being uniformly good, Mr. Tullis, field crops commissioner, is confident that after the rather poor season of 1931, this crop is back to normal again, and anticipations of a good exhibition are running high.

B.C. Onions For New Zealand

A new export cargo, in the form of onions from the Okanagan Valley, left Vancouver recently for New Zealand. The shipment amounted to about six carloads and was brought about as a result of a favorable showing made by a small lot of B.C. onions to that market last year.

How many men and women everywhere spend a good deal of their time wishing they were playing some other role in the never-ending drama of life?

Life is full of checks and many of them are forgotten.

Controlling Hog Cholera in Canada

Stringent Methods Have Practically Eradicated This Troublesome Disease
Strict adherence to a definite policy in dealing with hog cholera has enabled the health and animal branch of the department of agriculture to practically eradicate this troublesome disease from Canada. In six provinces there was not a single outbreak of the disease during March 31, 1932, and several slight outbreaks in the last year.

Three provinces were controlled and eradicated without any difficulty. The report of the veterinary director general, which may be obtained from the publications branch, department of agriculture, Ottawa, describes the procedure followed in coping with the disease. When cholera is found to exist all hogs showing symptoms of illness are promptly slaughtered and the carcasses destroyed and the premises thoroughly cleaned and disinfected. All other hogs on the premises and those already exposed are kept under strict quarantine. When the quarantine restrictions are removed compensation is paid for the slaughtered hogs, unless it is shown that the owner has been feeding collected garbage, as the feeding of garbage obtained from premises other than those where it is sold, is prohibited, except under license.

Standard Turkey Grades

Uniform Description To Be Used By Three Prairie Provinces
Discussion of poultry grading by representatives of the three prairie provinces at a conference held recently in Regina, led to a decision to practice the federal department of agriculture that agreement had been reached on the desirable for turkey grades to be used in Manitoba, Saskatchewan and Alberta this fall.

A wire sent to Dr. Grisdale, deputy minister of the Dominion department of agriculture, after the conference, said the following terminology for turkey grades will be used in the three prairie provinces this fall: Turkey, No. 1, No. 2 and culls.

Chilled Meat Trade

Ontario Plans to Build Up Exporting Business With Britain
The departmental committee of the Ontario Legislature is in possession of a plan to establish a "meat clearing" and exporting business from Canada, with a view to supplying Britain with some portion of her fresh foodstuffs.

This plan has been submitted to the British premier and the imperial economic committee by Major Palmer, of Vancouver, and has, within the last few days, been sent to the agricultural committee from Vancouver. Among other suggestions, the plan calls for the establishment in Britain of 100 retail depots for the disposal of Canadian chilled meats and other products. It suggests central and cold storage depots in Canada, and the plan, as outlined, involves an expenditure of \$9,615,000.

Cheese and Also Butter

Canadian Product Is At A Premium On The British Market
Not for some years, says the *New Leader*, has the Dominion dairy and cold storage branch dated September 10, has Canadian cheese commanded as great a premium over the New Zealand product as during the past few months. Cutting off the fractions the *New Leader's* quotations are, in shillings per 112 lb: White cheese, Canadian, 57 to 59; New Zealand, 54 to 56; colored cheese, Canadian, 56 to 57; New Zealand, 53 to 55.

The *New Leader* also calls attention to the fact that the United States is rigorously enforcing the legal standards of the composition of butter, which are the same as in Canada, namely, a maximum water content of 16 per cent, and a minimum fat content of 80 per cent.

Crop Handling Suggestion

Ben Smith Says Canadian Pools Should Enter Arrangement With British Government
That the Canadian pooling associations should arrange with the British Government to handle a fixed proportion of the Canadian crop on a five-year contract at fixed prices is one of the conclusions arrived at by Ben Smith, British Labor M.P., as a result of his visit to the Dominion.

Mr. Smith also believes that British immigrants would be encouraged to settle in the country if it were possible for them to have some community life to live in the new case.

Hemp Growing In Manitoba

Plants Grown From Seed Imported From Russia and planted last spring in Manitoba, has produced an excellent quality of full matured seed, according to a statement issued by the J. B. Key Company. The indications are that this hemp will prove a heavy yielder of seed, thereby doing away with the need of further importations.

Air Service From Germany to Japan

A German air service between Japan and Japan, via Hankow and Peking, will be established next year, according to an announcement of the Aeroflot Company.

The first electric lamp was marketed about 1860.

Enormous Amount of Land Held In Western Provinces To Provide Network of Highways

Motor traffic has focused so much attention in recent years upon roadways that but little thought has been given to other features of this system of communication. A study of a road map of Canada necessarily attracts attention to the enormous amount of land that has to be reserved in each of the provinces to provide the network of highways.

Chilled Meat Trade

Ontario Plans to Build Up Exporting Business With Britain
The departmental committee of the Ontario Legislature is in possession of a plan to establish a "meat clearing" and exporting business from Canada, with a view to supplying Britain with some portion of her fresh foodstuffs.

This plan has been submitted to the British premier and the imperial economic committee by Major Palmer, of Vancouver, and has, within the last few days, been sent to the agricultural committee from Vancouver. Among other suggestions, the plan calls for the establishment in Britain of 100 retail depots for the disposal of Canadian chilled meats and other products. It suggests central and cold storage depots in Canada, and the plan, as outlined, involves an expenditure of \$9,615,000.

The agriculture committee of Ontario proposes to act through the Dominion Government for the purpose of having one or more executive representatives to the imperial economic committee come to Canada. When they arrive, the agriculture committee will arrange to have Major Palmer, of Vancouver, on hand to attend the conference.

The plan submitted by the major calls for a great deal of comment in British circles connected with the economic committee.

What Wenbley Has Accomplished

Brought Home Idea of Buying Empire Made Goods
If Wenbley has done nothing else, and could it have done anything greater? It has brought right home to innumerable English women a sense that all the British are one family and that membership of it is a real partnership among our far-separated Commonwealth.

One notices the change of attitude among women shopping. They are no longer their guests, but as to where the goods come from. One often hears a shopper say: "Are you sure it is made in the Dominion? I want empire goods."

A quick change in the contents of many shop shelves is being hastened to meet this new demand for everything that British and overseas manufacturers can supply. It is imperial preference in the most practical and better form than closer trading with the empire could take. Yes, Wenbley has taught us that we are all one family, and that we can "keep the money in the family" only by dealing in the empire.

Taking No Chances

A tall, nervous-looking man rushed into the grocer's shop in a village. "Sell me all the stale eggs you have," he demanded.

"Well, I don't usually sell stale eggs," said the grocer, "but I could let you have some if you—"

"I must have all you've got," he said. "You suppose you're going to see Hamlet at the village hall tonight?" said the grocer knowingly.

"Hush!" said the stranger, glancing around nervously. "I am Hamlet!"

A politician may shake your hand one day and your next.

Danish Competition In Butter

Growth Of Dominion Butter Export Exceeds That of Denmark
Leading agriculturists, farmers, dairymen, representatives of export associations and private exporters, assembled at Copenhagen, Denmark, under the presidency of the minister of agriculture to discuss the export of butter to foreign countries, particularly Great Britain. The speakers all emphasized that the heavy increase in the export of Dominion butter to Great Britain, coupled with the systematic agitation organized in England for enhanced marketing of butter from the conditions in the future, was going to greatly intensify the competition with Danish butter.

Staten's Opportunity

Canada is a country hard to govern. But it offers grand opportunities for real statesmanship. Leadership that takes cognizance of conditions, that grapples resolutely and fearlessly with problems, that declines to drift, that puts public affairs before party profits, that redresses real grievances, that practices concord, that thinks and plans and acts nationally—such leadership means more to the Dominion and its citizenship these days than any asset in statecraft.—Toronto Globe.

A Business Woman

Being elected chairman of one of the largest catering firms in the world, Mrs. Thomson-Price, an Englishwoman, has given proof of her advancement in the commercial and industrial world. This lady is also vice-chairman of a very well known art publishing firm.

An Ancient Pet

Mrs. Edwin Barker has inserted a "Lost" advertisement in all the papers of Brockton, L.I., for the return of a pet turtle, which she claims was a pet of the family for 200 years. She thinks some thoughtless materialist carried the turtle away.

It is not always wise to tell all one knows, but it is well to know all one can.

The City of Quebec as Seen from The Air

The above photo, taken by Edelchild Aerial Service Co., of Grand Mere, Que., gives a splendid birdseye view of the Old City of Quebec in the foreground, and DuRoi's Terrace, the Citadel and the St. Lawrence River, extending in the background up to Montreal.

The Barrie, Examiner, Barrie, Ont., pays the following tribute to Mr. Cockburn, who has come to Clareholm from that place to take a position on the staff of the School of Agriculture:

"Few men coming into Barrie have made more genuine friends in such a short time than did Moffat Cockburn, District Representative of the Department of Agriculture. In addition to his faculty faculty of making friends, Mr. Cockburn is possessed of ability, fine initiative and an enthusiasm that is contagious, winning for him the personal acquaintance of all whom he interested in his plans. As a citizen, as a Kiwanian and as a representative of the Department of Agriculture, Mr. Cockburn won golden opinions from all with whom he associated. Now that he has been designated the time-honored advice of Horace Greeley and gone West, his friends here wish for him continued success, feeling confident of his admirable qualities so much appreciated here will also find suitable recognition in Alberta."

In Honor of a Great Event

Birthdays are always important occasions, especially if one is very young or very old. Before long the Youth's Companion will be a hundred years old, and the event is going to be made a memorable one for the Companion's many friends. So, although the date is not until April 10, 1927, preparations will begin with 1926.

In honor of its birthday the Companion will come to you next year at the new low price of \$2. It will be dressed in its party clothes, with new and colorful enlarged illustrations, new brilliantly clear type, and over 200 pages more than last year. It will contain 9 beautiful serial stories, fascinating mystery stories, tales of adventure on land and sea, the new "Take it and Give it" pages, radio, games, books and puzzles, interesting special articles, and the ever-entertaining Children's Page. Don't miss this great year of The Youth's Companion; subscribe now and receive:

1. The Youth's Companion—22 issues in 1926, and
2. The remaining issues of 1925. All for only \$2.
3. Or include McCall's Magazines, the monthly authority on fashions. Both publications, only \$2.50.

GOVERNMENT DEFEATED

Conservatives Have the Largest Group, But Not a Clear Majority

Ottawa, Oct. 30.—Canada's general elections end with Arthur Meighen, Conservative leader, as head of the largest group in the next house of commons. But returns so far available do not give any party a clear majority over all. Were Mr. Meighen to capture every one of the remaining seats, he would have but a bare majority of one when a new speaker is elected.

Returns so far available, give the Conservatives 118 seats, Liberals 97, Progressives 20, Independents 2, Labor 2, doubtful 6.

In the Macleod constituency the returns so far available give Coote, Progressive, 4,028; Heron, Conservative, 3,429; Milnes, Liberal, 1,533.

IN THE DISTRICT COURT OF THE DISTRICT OF MACLEOD

SOLVES PROBLEM OF TRANSPORTATION OVER DEEP SNOW

Necessity is the mother of invention. At least every one who has ever lived in a cold country knows this. It is why we have the telephone, the radio, the electric washing machine, chewing gum, aspirin and hobbled-lair. All members of our Mother Necessity's vast and ever growing family.

And now the transportation branch of the family circle has been added to by the advent of a very healthy and important youngster who has a bright and promising future ahead of him. He is called the Snow Motor, a name which was given him because of his amazing ability to move himself and anything that was attached to him as easily over six feet of snow as an ordinary wheeled vehicle does over a paved road.

The Snow Motor was invented by a man who has spent the greater part of his life in the snow-bound wildernesses of Alaska and whose livelihood depended upon his ability to transport himself and certain weighty commodities, such as lumber for fire, over vast snow-covered areas without losing either his life or his lumber.

It did not take more than a few winters in the frozen north to convince this gentleman, whose name by the way is F. R. Birch, of Seattle, Washington, that there was something radically wrong in the matter of vehicular traffic in countries where very heavy falls of snow were common and inevitable occurrences. Not only was this true, in regard to the difficulties of hauling of heavy loads but in the transportation of the inhabitants themselves who are often quite unable to carry on the ordinary pursuits of life and business during the winter months: months when whole communities had either to go to a hospital or fight against the snow with sadly inadequate equipment of sleds, what is known as "dog teams" or to suffer from snow-bound for the winter and completely cut off from the rest of the world.

And so, urged on by Mother Necessity, Mr. Birch and his associates conceived the idea of the Snow Motor. And this what the Snow Motor is. It floats over snow and, in floating, packs the snow down smoothly and makes every satisfactory surface for other vehicles to travel over. It hauls everything loads over snow of any depth; it hauls lumber from the forest, ore from the mines, pulp wood to the mills, mail to rural snow-bound communities, passengers from one place to another.

It is welcomed by an appreciative public. Fifty chapters—from "Agriculture" to "Industry"—include a series of striking facts presented in a crisp, terse form that fastens them on the mind. The 1925 issue of the Snow Motor is a new matter, including a striking comparative table of our national

(Upper) Hauling heavy snow loaded with log through ice by covered sled (lower) Road breaking over snow at fast speed with lead of leader. (Lower) Road breaking over snow at fast speed with lead of leader. (Lower) Road breaking over snow at fast speed with lead of leader.

gers from one such community to another, and in fact does practically everything that an automobile or a tractor does in places where there is no snow. The Snow Motor is a weird looking contrivance which rides the crests of the deepest snow drifts, climbs over fences, stands on its double-barrelled nose and drags its great loads behind it without any apparent effort. As manufactured at present it is attached to Fordson tractors which provide its motive power. Later it will also be used on standard automobiles, when it will travel at a rate of twenty-four miles an hour.

Striped of its motive power it consists of two cigar-shaped cylinders or drums to which flanges, resembling cork rollers are attached. These cylinders literally float on the top of snow drifts, for they displace snow equal in weight to the weight of the machine, just as a boat displaces water in proportion to its own tonnage. For heavy hauling the Fordson tractor stripped of its wheels and axles, is mounted on the Snow Motor and the cylinders are caused to revolve with the result that the Motor turns its way along by means of the screw arrangement on the cylinders. For lighter, or passenger traffic, the wheels and axles of an automobile are removed and replaced by the Snow Motor. In summer the wheels can be put back again.

In snow-bound districts, up to the present, every effort has been directed to find ways and means for the removal of snow as the only way of making the roads traffic. Now, however, the Snow Motor comes into being with its funny looking cylinders and floats merrily over soft snow drifts, hard ice, in fact any condition of snow and as it goes makes a road for light vehicles to follow immediately and after thorough packing of loads of any weight.

Such is the latest and most important invention of Mother Necessity's family of inventions. It is built by Snow Motors Incorporated in Detroit, Michigan, under the presidency and general management of A. E. Knobloch. It has already proven its ability to do the surprising things referred to above and there seems to be very little doubt that it will be in general use in mining and lumbering operations during the coming winter. It is expected that such a condition of water will find some new use it can profit from, but it will not be long until it is used in the limit of its adaptability should be proved.

growth during the quarter of a century since 1900. The book may be secured at leading dealers, or by sending 35 cents to the Canadian Facts Publishing Co., 385 Huron Street, Toronto. He who would know the Canada of today a wonderful little book means to that end.

Here and There

The output of silver from Canada during July amounted to about 400,000 ounces, according to preliminary estimates. This had a value of about \$300,000, or at the rate of about \$3,000,000 a year.

All attendance records for the Central Canada Exhibition were broken this year. There was a total attendance of 149,200, or 42,400 greater than the previous record of 107,000, made in 1922.

The first Italian ship to visit Vancouver in several years was the steamer Piave II, of the Navigazione Libera Trentina, due here at the end of the month. This boat will inaugurate a new service between this port and points on the Mediterranean.

Production of paper by the Powell River Company, at Vancouver, will complete a \$5,000,000 development programme, now under way, according to an announcement made by M. J. Scanlon, a director of the company. At present the plant is turning out about 70,000 tons a year.

Signs of returning prosperity to Canada are evidenced by the fact that more Canadians are registered in the Canadian Pacific Railway Mountain resorts during the past week than at any time since the beginning of the year. These resorts, which are usually filled almost entirely by Americans, contain a guest list last week which is 50 per cent Canadian.

Production of gold in Ontario for the first nine months of this year, amounted to \$1,150,000, as compared with \$1,110,000 in the corresponding period of last year, according to a report issued by the Provincial Department of Mines. Silver production increased from \$280,000 to \$279,000. Total mineral production was \$1,560,000, as compared with \$2,097,770.

John Edwin Locke and Frank S. Witton, who travelled across the entire continent in a small motor-boat arrived recently in Montreal and moved their craft to Canadian Pacific Pier No. 8 having come from Astoria, Oregon, via Columbia River, Colville, Port, Fort Benton, the Missouri and Mississippi Rivers, the Chicago Drainage Canal and Lake Michigan since May, 1926. From Montreal they continued their journey to New York and returned to the States, via Canadian Pacific Railway to Vancouver and Seattle in order to see the country.

The groundwork for what promises to be a big industry is now being developed by the Singer Sewing Machine Company at Thursto, a town on the Canadian Pacific Railway, on the north shore line to a point. It is planned by the Singer Company to manufacture at Thursto all the workroom requirements of numerous plants in different parts of the world. Work on the new plant is being pushed with all possible speed and it is anticipated that shipments from Thursto will commence sometime early next year.

While the Canadian Railway Commission is besieged with all kinds of applications for reductions in Canadian freight rates, the Western group of railways in the United States is asking for a five per cent increase and the northwestern section of the group is asking more than that "as a measure of relief." Some of these roads are in the hands of the receivers. Yet these American railways already have higher rates than the Canadian roads, the Atlantic Coast Line in the U.S.A. being 1.238 cents per ton mile on western lines as compared with 1.011 cents on all Canadian railways. The average rate in the U.S.A. is 28 per cent above the average Canadian rate. Owing to the low grain rates in Canada the C.P.R. average rate is 1.011 per ton mile, so that the average rate on American western lines is more than 30 per cent above the average C.P.R. rate.

Sweet Clover In Crop Rotation

Cropping System Recommended to Maintain Fertility of the Soil

Writing on "Sweet Clover in Crop Rotation," in Pamphlet No. 56, Sir M. A. Derick, of the Brandon, Man., Dominion Experiment Station, states that if grain growing to be continued on the prairie as the basic agricultural industry it may be necessary to establish some systematic arrangement of crops so that there may be alternation with grasses and clovers in order that weeds, plant diseases and insect pests can be effectively controlled. He adds that where clover is grown once in three to four years the nitrogen content of the soil is likely to be maintained and possibly increased.

Mr. Derick suggests as an outline for a rotation on a stock farm, or on a portion of a grain farm near the buildings to provide pasture for horses and milk cows, the following rotation might be followed:

First year, summerfallow; second year, wheat (half acre, second half, sweet clover); third year, half field, coarse grain and half field, sweet clover.

In carrying out this rotation, Mr. Derick explains, the farm is divided into three fields, one-third summerfallow, one-third wheat and one-third sweet clover, with the remainder of the farm in coarse grain and sweet clover. When the three years were up the sweet clover should be grown on the half of the area which had no sweet clover in this, the first cycle.

Continuing, Mr. Derick gives the following as a suggested rotation where large amounts of pasture are required:

First year, sweet clover sown with oats in early spring; second year, pasture ploughed up in late spring; third year, wheat; fourth year, oats; fifth year, corn.

In this cropping system three-fifths of the farm are in forage crops each year. In this pamphlet, which can be had free by addressing the publications branch, Ottawa, the Dominion Experiment Station, fully into the cultivation, uses and treatment of sweet clover.

Broadcasting in Ancient India

Simple Method Used By Emperor in Third Century B.C.

Though avials and crystal sets were unknown in ancient India, it had its own method of broadcasting. This was a simple one, unsophisticated with atmospheric conditions and wave lengths. In essence it was a species of soundering, the placards being of solid steel.

This curious form of "wireless" was used by the great Emperor Ashoka as long ago as the third century B.C. Ashoka, a worshiper of Shiva, embraced Buddhism in 241 B.C. He was so impressed by its splendid principles that, if tradition be true, he had them inscribed as edicts on no less than 65,000 stone pillars or tablets, which were subsequently set up throughout the empire for the improvement of his subjects. Of these reputed 65,000 pillars, only six now remain, two each at Delhi and Lauria and one each at Allahabad and Banah.

A Remarkable Auction Sale

Every 21 Years Old English Custom is Revived

A remarkable auction sale is announced to take place at Chelvey, near Bridgewater, England. The auction, which is held every 21 years, is for the letting of "Church Acres," left in 1490 by one Yea, with instructions that the sale should take place during the burning of half an inch of candle, the last bidder prior to the candle being consumed becoming the purchaser.

The proceeds are vested in the rector and churchwardens for the time being to be expended as they think fit upon repairs to the village church. For four centuries the custom has been observed.

The half-inch of candle rests upon a layer of oil placed upon an upturned egg. As the rector applies a match to the wick the community make the old room of the Manor House ringing with hearty cheers.

Horse 57 Years Old

Discovery of the oldest living horse in the country, and probably in the world, is reported by Dr. A. D. Gay, a veterinarian of Washington, N.J. The horse, "Old Bill," is said to be 57 years old and is owned by John Jordan, a Harrow, township farmer. Jordan produced papers recording the birth of "Old Bill" in 1849. The animal still performs the regular daily labors of a farm horse.

Life is mostly froth and bubble; Two things stand like stone—Klondike in another's trouble, Grouse in your own.

W. N. P. 1297

Thought Court Summons Was Too Undignified

Gentleman of Independent Means Wrote Letter to Magistrate

Nine Courthouse Magistrate described as a gentleman of independent means, living at Half Moon Street, actually, was summoned before the Newcastle bench of magistrates for causing an obstruction with his auto. He did not attend, but sent the magistrate a letter, which read in part as follows:

"I received the enclosed summons today at my father's (Sir Richard Murgess, Bart's) house, and should be very much obliged if you would be good enough to have my full name and proper designation inscribed thereon. I think you will find, if it would not be putting you to too much trouble in looking up Burke's Peerage and Baronage, that being the eldest and only son of my father, I am entitled to the designation after my name of 'Esquire,' although no doubt the Inspector who was so very rude to me on the 15th of July still considers that I am a criminal outcast and not even entitled to be addressed as 'Sir,' which I believe it is the duty of an Inspector and ordinary constable to do, and I am anxious to address him and speak to him as such.

I recently saw my cousin, Lord Hastings, about the matter, and he advised me to take up the whole matter, which I intend to do, and if, which I think is very probable, you are to deal with the matter in the right way, I shall go and see the Lord Lieutenant of the county about the whole thing, when I have personal views on the matter and he will advise me as to the best course to be adopted."

Lord Hastings, as chairman of the magistrates, read the letter in open court, and offered the following comment:

"I am really sorry for the man who writes such a letter as this. In a few years he will be dead, as we all shall be, and this nonsense is very troubling."

A fine of 10s. and 10s. costs was imposed. The lord mayor said that he would treat it as an act of ordinary human being and with due regard to Mr. Murgess's dignity.

Airship Designers Are Not Defeated

Lessons Learned From Disasters Will Be of Use to Future Victor

Against the disasters, which have the airship achieved? During the German War, Zeppelins flew from Germany to England, summer and winter. Only three or four were brought down, but many of those that got safely back were seriously damaged by shrapnel. They proved that they were able to stand an astonishing amount of injury and yet remain aloft. A British-built airship was torn from her moorings just a few months ago, her nose crumpled up, and she was swept across to the British coast coast by fierce gale. For sixteen hours she battled the winds—and made her way home again with every man safe. The British airship, H-23, crossed the Atlantic and returned, and a German craft also flew to the United States. This is striking evidence of the capacity of airships for long flights, even when crippled, and when engineering skill has achieved no more than it is likely that airship designers and navigators will admit they are beaten and decide to withdraw. The lessons are deplorable, but from each one of them something is learned that contributes to ultimate victory.

A Canadian Heroine

Girl Who Frustrated Enemy's Plans in War of 1812

Sunday, Sept. 15, was the 105th anniversary of the birth of Laura Secord, Canadian heroine of Beaver Dams in the war of 1812. At the risk of her life, this girl carried a message through the danger zone, that saved the day for her countrymen. According to history, Laura Secord obtained word of the enemy's plans of action at Beaver Dams, and without the risk of the overwhelming chances of the loss of her own life, hurried through the greatest of danger to Col. Ruggles of the Canadian forces with the information. Due to her efforts the enemy's battle plans were frustrated. Chief among the many commendations with which this heroine has been honored, is a monument at Queenston Heights.

To Study Conditions Here

To ascertain at first-hand the true conditions which exist in Canada to the Canadian visitor, Captain Victor Galest, M.C., member of the British House of Commons for Cheltenham, and parliamentarian secretary to the president of the board of trade, Sir Philip Cunliffe List, is making a tour of the Dominion.

The world's largest blue diamond, weighing 127 carats, has been brought to New York.

Aniline Dye Was Named After Battle

Discovered in Year of Great Conflict Between France and Austria

How many people associate this term with the great battle which was fought between the French and Austrians sixty-six years ago. The famous aniline dye received its name from this battle, Sir W. H. Perkins having discovered it in the year in which this battle was fought, viz., 1829. It may be correctly said to be the founder of the modern industry of the coal tar colors. It was in 1824, the celebration of the jubilee of the discovery, that it was announced that no fewer than 70 separate and distinctive coloring matters can be obtained from these coal tar products. The first color, which Sir W. H. Perkins succeeded in producing from aniline received the name of mauve.

Black Maria's Carriage

How Police Wagon Came to Have This Name

The reason why police wagons are called "Black Maria" is said to be explained in the following article. "About 1835 or 1840 there resided in New York City a woman of African descent and blackamania habits bearing the classical name of Maria. Her speech was frequent and glorious. Whenever she indulged she was always nabbed by the police. They invariably had to put her in a wagon to take her to the station house. This thing occurring so often, the vehicle was called Black Maria's carriage. Therefrom the van used to convey prisoners came to be called the Black Maria."

Queen Mary's Newspaper

Queen Mary has adopted a new style in her private notepaper. When Mrs. Burner-Whitely, who was a maid of honor to the Queen before she married Mr. Burner-Whitely, of New York, 20 years ago, sent her some flowers the other day, the Queen replied on a piece of paper which was of an ornate design, that bore in one corner an etching of the Queen's favorite corner of the Palace gardens.

Not in Any Hurry

"Come across," cried the French to the United States in 1914. And they took their time. "Come across" echoed Uncle Sam, bill collector, to France in 1925. Answer, ditto.

Every American president has left office in poorer health than when he was inaugurated.

Butter From Western Canada

Estimated That This Year's Production Will Amount to Fifty-five Million Pounds

During 1924 the three prairie provinces of Alberta, Saskatchewan and Manitoba produced nearly 55,000,000 pounds of creamery butter. Of this several million pounds were exported to Great Britain and to Japan and China. The year's combined production of the prairie provinces is estimated at 55,000,000 pounds. It is fairly predicted that within five or six years the output of butter from the prairie will equal 100,000,000 pounds a year.

British Columbia is not yet in the butter-exporting business but its production has doubled in the past few years.

In the butter exports from Canada, however, Vancouver is now figuring prominently. Only a few weeks ago the Canadian butter market was flooded with deals in all kinds of meat and dairy products shipped about 6,000 boxes, or approximately 120 tons of butter from Alberta through the port of Vancouver to London. Recently, also, an Edmonton, Alberta, dairy shipped direct 140,000 pounds by way of Vancouver to the London market. This Canadian butter was very favorably commended on by the British importers. It must with a good reception by the consuming public, and it may be expected that further large shipments from the coast will be sent to the British market before the end of the year.

New Jersey Importation

Seven Jersey heifers from the Island of Jersey have reached the Fraser Valley, B.C., and are now with David Spencer head of Port Hanger. They were purchased by Colonel Victor Spencer, head of the farm department of the Vancouver stores, during a recent trip to Europe. One of the animals was shown at the provincial exhibition, New Westminster, B.C.

England has just celebrated the birthday anniversary of the birth of Richard Doddridge Blackmore, author of "Lancelotti." Blackmore died in 1900.

Spent Whole Life in One House

Mrs. Marian Osborne, a Derbyshire lady, has just died in the house in which she was born 99 years ago. She never spent a night away from home.

Centenary of London Buses

First Real Omnibus Was Put on Streets at Nantes in 1825

Among the numerous centenaries which may be celebrated this year if anyone feels disposed, is that of the omnibus. The omnibus "for all" was, of course, a direct descendant of the stage coach, which flourished in England until it was superseded by the railway. But the first real omnibus, carrying passengers for short distances in towns, seems to have been put on the streets at Nantes in the summer of 1825.

Mr. Shillaber, formerly a coachmaker in Paris, started a line of buses in London in 1829, the route being from Paddington to the Bank, and the fare one shilling "all the way."

After that the development was fairly rapid, and seats on the roof became common. It was not until 1855 that the L.G.O.C. came into existence, absorbing a number of smaller firms and beginning with 585 buses.

More Than Hard Work

Writing is Not Easy Even For Talented People

"Writing is just hard work," modestly says Cora Harris, who writes very well indeed. Of course, it is more than that. Most people cannot write well, no matter how hard they work. But also, no one, however talented, can write well without hard work. "Language is not a gift," it necessarily hard to write. And the knowledge, the thought, the feeling, the imagination, the observation and experience of life, without which there is nothing to write about—these come only after exceedingly hard work. Writing is talent, a trade, an art and a life. Only the intense concentration of all these can produce anything greatly worth while. —Kitchener Record.

Encouragement To Art

As an encouragement to a Canadian artist, the Winnipeg war memorial committee has decided to conduct a competition for a memorial design for the proposed cenotaph in that city. All British subjects resident in the Dominion will be qualified to enter the contest. The closing date for the competition is Jan. 1, 1925. A prize of approximately \$500 will be given to the successful competitor.

Freezing temperature of rail water is four degrees lower than that of fresh water.

Tourist Business Is Profitable

Enormous Sums Annually Brought to Canada Through Tourist Traffic

Many of the persons in Canada have heard of where the American city of Pittsburgh is? Pittsburgh, not Pittsburgh.

Probably not very many. For Pittsburgh is not in the class of high centres as New York and Chicago, Philadelphia and Detroit, Boston and St. Louis and Los Angeles.

Yet Pittsburgh—a Manchester city of some forty thousand—is a pretty active centre of interest in Canada. Not long ago Hon. Chas. Stewart minister of the Interior, had a sketch map published and widely distributed showing the main automobile roads connecting Canada and the United States. One of these maps reached the secretary of the automobile clubs of Pittsburgh, and he promptly wrote back saying:

"You mean there are one hundred of these maps we would be pleased to receive them as we are receiving calls daily for road maps of Canada. The fact that the map of Pittsburgh is merely typical. It is quite true of literally scores and hundreds of American cities. The fact is that the automobile clubs of Canada by American motorists come from all directions—from New York and California, from the Gulf States, from the Mississippi Valley and the Pacific Northwest. Clear across the states there is town after town, and Canada and how to get there is eagerly sought."

For the tourist trade coming to the Dominion is worth something in a year is a tidy problem to figure out. For 1925 the estimate is placed at \$20,000,000 for the city of Vancouver alone. A Halifax paper quotes an estimate of \$25,000,000 per annum for the whole Dominion. Food, the greatest of the Canadian Automobile Association, predicts that Canada's tourist business will in a few years be worth \$50,000,000 annually.

It doesn't matter much what the exact amount is. The tourist trade is one of the greatest business developments that has struck the Dominion in many years, and the chief interest of the Interior department in regard to it lies not so much in the actual value of the present volume of tourist business, but in seeing that Canada's magnificent resources and attractions are brought to the attention of the prospective tourist from abroad as well as extensively or effectively than the Dominion's resources in agricultural lands, in waterpower and other physical assets have been brought to the notice of prospective investors, inventors and business men generally.

King Does Not Like Fishing

Very Rarely He Indulges in This Sport

I am rather unkind to read a long account as to the fishing rods possessed by the King, and as to recent purchases for His Majesty of up-to-date tackle. It is a pity that the King is a matter of fact the King has no liking for angling of any kind, and it is very rarely indeed that he throws a fly, though the Ben water at Balmoral Castle includes some first-class pools, which invariably hold heavy fish in the autumn. He has not, however, His Majesty has a cast on one or other of the hill lochs in which trout abound. They are small, but easy to take, and they give good enough sport. It is a common thing to land trout at a time.

The Prince of Wales is also no angler. Angling he votes "too slow by half." When he was a boy the Balmoral keepers had great hopes of making a fisherman of him, but within recent years he has not handled a rod. Similarly with his brothers; not one of the princes is a keen angler. —London Mail.

The High Standard of Loureux

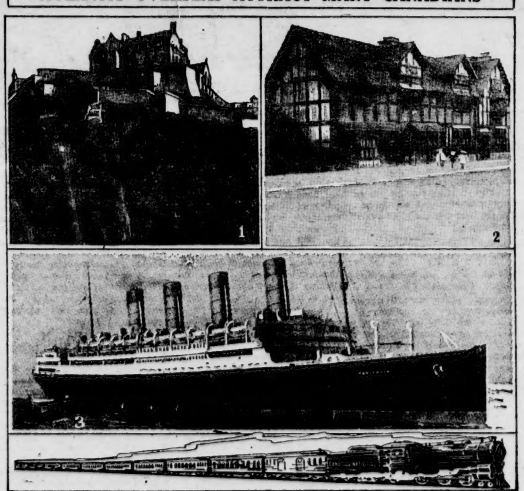

There is no guarantee that the installation system encourages extravagance by families that are not able to afford them. This country enjoys a standard of living higher than all the rest of the world and higher than any other country in the world. It is a fact that something to boast about. Luxuries often cost more than the mere money paid for them. —Lonsville Courier Journal.

Stop Growing in B.C.

The yield of hops in British Columbia during 1924 amounted to 412,228 pounds, valued at \$317,519, as against 599,994 pounds, worth \$392,922 in 1923. The report of the provincial agricultural department of agriculture. Hop production in the Dominion is all confined to this province.

Owls cast up the indigestible parts of their food in the form of pellets. Owls, like all birds, cast these pellets from two barn owls showed results of 225 meadow lark, 179 house sparrow, 29 snipe and one bird.

HOLIDAYS OVERSEAS ATTRACT MANY CANADIANS

Christmas at home has a charm for the average Briton that is not to be denied, for nowhere in the world is there a greater observance of the old Yuletide customs than that which prevails in the British Isles. Friends and relatives of those who have come to this country to make their home in the Dominion look forward every year to the coming of the winter season, knowing that this is the time when the people of Western Canada have the time at their disposal for lengthy holidays necessary to enjoy some travel.

This year passengers travel to Great Britain and to other continental countries, promises to be better than for many years, according to officials of the Canadian National Railways in Western Canada, who state the preliminary inquiries already received indicate that more people are figuring on holidays abroad during the coming winter than for some time. Accordingly, officials of the national system are now making the plans for the handling of such business and the provision of Canadian National service between Western Canada and the Atlantic seaboard for the convenience of those who plan overseas trips. Canadian National agents at all points will again ticket passengers on all standard lines, and as the traffic warrants, special trains carrying both day coaches and sleeping cars will be operated from various western points direct to the boats' side at Montreal, Quebec, Halifax and other ports.

The English tourist, however, equipped with that of old associations, draws just as strongly today as ever, and to many a Western Canadian, these winter holidays give the one opportunity of visiting the old fashioned scenes and mingling again with childhood friends and with the members of the family left behind when he or she sailed for Canada to find a home in the new Dominion.

Rates and dates of sailings and special trains will shortly be announced by the Canadian National Railways. WORLD HAPPENINGS
BRIEFLY TOLD

Formation of a steamship company, which will establish a new trans-Atlantic line, has been authorized in Dublin.

Chilian Japanese alrmen will undertake a flight from Japan to Hawaii next year, according to the Japanese language newspaper, Haili shimpu.

Eight human skeletons unearthed during excavations at St. John's Hospital, Litchfield, Mass., England, are believed to be more than 700 years old.

Thomas Malone, commandant of the Irish Free State Air Force, was killed in a flying accident at Curragh. His machine crashed when he was flying low during an aviation tournament.

The Dublin, Ireland docks board is seriously discussing the development of Blackhead Bay as a trans-Atlantic port. It is urged that a voyage to Canada takes from that point only three and a half days.

A measure now before the diet which, if approved, will allow Japanese women to practise law in the courts of the empire. The measure is backed by the women's suffrage party.

When plans for the erection of a new lighthouse were discussed at a meeting of the Harbours and Light Commissioners, it was stated that there are only two builders of lighthouses in England.

The German Government has passed a law, in effect since August 1, making it unlawful for any German municipality to levy a tax against visitors and tourists. The tax, which probably will be reduced as a result of the law, is said.

The British passport-general announces that telegraphic communication between Great Britain and Holland can now be obtained (with the exception of the routes between 11 and 12 noon) practically without delay.

The Canadian high commissioner's office in London has received notification of the payment at the Bank of Montreal, Belgium, of \$23,262 as interest on the debt covering the purchase of Canadian horses and mules at the conclusion of the war.

French exports to Germany during the first seven months of 1925 increased in value 40,000,000 francs over the corresponding period of 1924, and imports from Germany decreased 100,000,000 francs. The exports totalled 2,181,000,000 and the imports 1,962,000,000 francs.

Mrs. Louisa Mallandaine, one of the oldest pioneers in British Columbia, is dead at Victoria in her 95th year. She reached Victoria from England in 1862 on the steamer Typhoon as the wife of a cargo of sixty marriageable lasses for which that vessel is noted in British Columbia history. She was then Miss Townsend.

New Source Of Alcohol

Discovers Every Baker Is Potential Alcohol Producer

Every bakery is a potential producer of alcohol as a result of the discovery of an Italian chemist that the fermenting liquid can be obtained in considerable quantities from the fumes given off by baking bread.

Andriassini is the Italian's name. He experimented for four years, using an apparatus constructed at a Berlin bakery before he attained success. His apparatus is capable of extracting approximately a pint and a half of alcohol from the fumes given off during the process of baking 220 pounds of bread.

This recovery process uses little waste product. It is estimated that it could save Germany millions of dollars worth of fuel and foodstuffs which now are consumed in the production of alcohol.

Germans suggest that such a cheap source of pure alcohol may revolutionize the bootlegging industry in the United States.

Large Meteor Falls In North Dakota

A large meteor crashed to the earth north of Sioux Falls, N.D., exploding as it struck. The meteor was going at a terrific speed. The exact spot of the segment could not be determined since the violent explosion scattered pieces over a large area. No damage was reported. The city water works is near the spot where the meteor fell, but was untouched.

Titled Biographers have reported that the first biographies have appeared recently in the ranks of London's leading affairs, and, all reports say, have made good. The latest to take up a commercial career is Lady Mary Howard, who not long ago entered the service of a well-known firm as a stenographer and secretary to the manager.

W. N. A. 1197

Naturalist Believes
Insects Good Food

Says Grasshopper Is Fine Eating For Human Beings

A famous naturalist believes that grasshoppers and similar insects would be valuable food for human beings, he says. "The grasshopper is good eating both for men and for dogs. Either fried or broiled, it is eaten after the feet, the wings, and the head have been removed; the rest is boiled or else served up in the form of meat balls. After being dried in the sun it is ground to powder, which may be stirred into milk or made into dough and then fried in fat but with salt." He also refers to the fact that, "Camels greatly like to eat grasshoppers, which are served to them either dried or after being roasted in a heap in a large hole between two layers of live coals. The negroes also eat them cooked in this way." And also that "The wives of the prophets, when anyone sent them a present of grasshoppers, always shared them with the other women." "The Calif Omar, one day when he was asked whether the use of grasshoppers for food was permitted, replied:—'I should like to have a basketful of them to eat.'"

An International Crime

Lord Robert Cecil Calls For General Treaty To Stop Wars

Lord Robert Cecil, British delegate to the League of Nations Assembly, supported the resolution calling for preparation of a general disarmament conference and consideration of some system of conciliation and arbitration. The 25th section of the League's resolution of aggressive warfare as an "international crime," he declared, merited special attention from the entire world. He recommended Britain's devotion to the principle of arbitration.

He pledged Britain's support to the league.

The assembly unanimously adopted a series of resolutions previously offered, endorsing immediate preparation of a study for an eventual disarmament conference, approving regional security pacts and asking the council of the league to judge what progress toward general security is achieved by such agreements and providing a new examination of present system of conciliation and compulsory arbitration in international disputes.

A Courageous Woman

Spending two years in a mountain cabin at an altitude of 12,000 feet was among the adventures undertaken by Madame David whose wonderful achievements are set forth in a new literary Parisian tale.

This courageous woman has just returned after fourteen years spent in the most inaccessible region of China and Tibet. She was accompanied by her adopted son, a young Tibetan, with whom she entered the forbidden city of Peking. This small, frail-looking woman, passed three years in a monastery studying the Tibetan language and ancient manuscripts. Time and again, after heroic efforts, she was turned back and finally approached Tibet from the north. Time and again, after heroic efforts, she was turned back and finally approached Tibet from the north. Time and again, after heroic efforts, she was turned back and finally approached Tibet from the north.

Providing Fuel For Motors

Billions of Dollars Are Spent Yearly For Gasoline

Five people realize what it means to provide fuel for the millions of automobiles in daily use. In 1900, before motor car production was well under way, the annual production of crude oil was \$5,000,000 barrels. This year it was \$1,000,000,000 barrels. The investment in the oil industry is now estimated at \$1,000,000,000, against about \$1,000,000 fifteen years ago. The United States alone will this year probably consume 1,000,000,000 gallons of gasoline, which at 20 cents per gallon would mean an expenditure of \$1,000,000,000—Thrift Magazine.

Kipling's Digestion Good

The late Sir Rudyard Kipling, killed New Zealand bird which is supposed to be a diminutive cousin of the extinct moa. His flesh resembles a combination of string, cement, and oil. Rudyard Kipling, in conversation with a New Zealander, recently confessed that he had eaten, and liked to eat, a bird which he visited that overseas dominion "down under." The fact that Mr. Kipling survived the meal is a tribute to his digestive powers.

Who was it who recently said that the cost of living was an ever-going down. It looks as if it was going to come down, but it doesn't.

THE CLIPPER
FASHIONS
Exclusive Patterns
by HandworkTo Sports Types
Tailored Details and Plaid Contributor

The "chance" plaid, furnishing fullness to the plain silhouette, brings the straight line tailored frock into even greater popularity. The plaid, however, has many delightful ways of unexpectedly appearing. On a dress of dark blue, there is here made of crepe-de-chine matching the becoming collar and slightly flared cuffs. The 25th section of the League's resolution of aggressive warfare as an "international crime," he declared, merited special attention from the entire world. He recommended Britain's devotion to the principle of arbitration.

His pledged Britain's support to the league.

Convinced Of Success
Amundsen Satisfied He Can Reach Pole By Air

Ronald Amundsen, whose recent attempt to reach the North Pole by air ended in failure, is reported to be planning another flight to the same destination—this time in an Italian-built non-rigid dirigible.

Few men now living know the idiosyncrasies of the North Pole as does Amundsen. His knowledge is of the first-hand kind. He is by the same token a competent judge of the possibilities of air navigation there. His own experiences with heavier-than-air machines in the flight from Spitzbergen, together with those of the subsequent MacMillan expedition, his better equipped anglo-british aeroplanes, have apparently convinced him that a lighter-than-air vehicle offers some possibility of success.

The proposed experiment will be the first of its kind. A lighter-than-air dirigible venturing into the climatic and atmospheric uncertainties of the polar regions has thus far never been attempted. It will be recalled that the Shenandoah was for a brief space being groomed for such a flight. But the plans were called off by the navy department, and the big dirigible was reserved for another destiny. It is to be converted to the more familiar, though also highly unaccountable, aerial contrivances of Ohio—Bristol Free Press.

Submarine Tractor For Divers

Electric Motor Drives Device Along Bed of Sea

A submarine tractor may now go about his work at the bottom of the sea in a water-tight automobile, says Roy's life. The deep-sea perambulator, consisting of a steel cylinder, is mounted on a tractor, having enough to accommodate two passengers. It is built to withstand the pressure of the water at a depth of two hundred feet or more and weighs eighteen tons. An electric motor inside the car makes it possible to travel at the rate of the mile of a river or sea. The walls of the car are provided with small windows looking out in all directions. Comfortably seated in this submarine tank the divers can explore miles of river or ocean bed, without coming to the surface. The submarine device is provided with compartments so that divers can leave it if necessary to enter a sunken wreck. It can either be lowered from a vessel or be driven into deep water under its own power. It has been used with success recently in clearing wrecks in Long Island Sound.

Exiled To Siberia

Russian Landowners Are Having Their Holdings Confiscated

The Russian authorities are sending into exile landowners and their landowners in accordance with an old decree of the Union of Socialist Soviet Republics. The decree provides that landowners in Siberia and other tracts of the Soviet republic.

The deportations are especially increased in the Far East, where the committees are handing the deportations.

In the Gomel district the committee added fifty families to the prescribed list of 125 families and ordered all to proceed to Siberia. However, the majority of the exiles was postponed until the crops had been harvested.

In another district, closer to the Polish frontier, 125 families were selected, including two that owned 40,000 and 30,000 acres of land, respectively. The owner of the latter area being a widow, saved herself from deportation by marrying a soldier.

Using Improper English

Warning Signs Placed Near Schools

Any place is a bad place for improper English, but there could scarcely be a worse place than in the vicinity of the schools. The school boards in many schools all over the country, road signs that are shockingly ungrammatical. Yet we have seen the Blenheim, Ont., News-Tribune, who is considerable of a globe-trotter, who does not need to go very far, but who is seen nearly planted warning signs "School-Gov. Slow." While outsiders this improperly states the students in the fact as they go to and from school, Indiana they are taught that the expression is wrong, and to correct them must say, "Go slow." The use of correct English in public places should be absolutely adhered to, and in the matter of placing signs or correcting them if they are wrong, the Blenheim paper recommends "School Zone," or another often used in Great Britain, "School-Cautious."

Telephone service at Jonesboro, Ind., was put out of service recently when a lightning strike hit the telephone wires as lines for it were being laid.

A Record Flight

Tiny Aeroplanes Travel at Rate of Over 300 Miles Per Hour

A tiny aeroplane scorching through the air recently at 300 miles an hour—faster than anything built by man ever had travelled before.

Propelled from the terrific air pressure by an enclosed cockpit, Lieut. Al Williams, naval aviator, made history as his plane sped over the kilometer course (five-eighths of a mile) at Curragh Field, Long Island.

The plane is small as aeroplanes go, it is 29 feet from propeller hub to tail fin, 22 feet from wing tip to wing tip, and at its highest point stands only eight feet above the ground. It is driven by a 4-cylinder Curtis motor of horsepower.

The craft bettered by 24 miles an hour, the existing record held by the machine of Lieut. Williams, although advice from Washington said Williams' record would not be recognized officially, because he did not fly over the standard three-kilometer course.

The flight was one of a number at Curragh Field, Long Island, which were made to establish an average speed for the purpose of ascertaining whether the plane complied with the government specifications which require an average minimum speed of 255 miles an hour.

Beardmore Gold Field Worth Prospecting

But Report of Geologist Is Not Unduly Enthusiastic

The Beardmore gold field, which was the object of considerable interest when discovered recently in the vicinity of Fort Williams, in the district of a report made by the provincial geologist, to Hon. Charles McCreary, M.P., has been the subject of an examination of the district was made.

While the report does not seem unduly enthusiastic over the new area as a gold proposition, it considers it distinctly worthy of further prospecting and development. Certain locations in which discoveries were made during the summer were the scenes of gold rushes, in which considerable quantities of gold were obtained.

Answer To Last Week's Puzzle

- 1—Cover with tar again.

Wonderful Surgical Work

Rebelling Faces Of Mutilated Soldiers Reached Fine Art

In an account of the medical services of the military of persons, contributed to the Lancet, Dr. Alex. Sand, principal officer of the military, says that with jaws and faces smashed by shrapnel and bullets, he has achieved in human form, the most delicate technique, and sheer genius for this special task were happily at the disposal of the military in the service of its facial surgeons. The value and wonder of this work could be expressed in words.

For the patients, doomed, as they thought, to mere existence . . . It has meant rescue from a living death.

Since March, 1920, at Sidcup Hospital, 2,544 facial operations have been performed. Happily the need for such work is now slight.

Funds For Publicity

Canvas On In Edmonton To Bring In U. S. Settlers

Armed with "prospector cards," bulletins, and other convincing arguments, 20 Edmonton business men started on a final canvas-for funds tour to carry on the publicity drive which the local board of trade has planned to bring settlers to the United States to Central Alberta. The objective set is \$10,000 and, this year, the figure of \$10,000, representing the total of grand subscriptions now being called for, will have been reached.

He walks 20 miles every day, and can even stand on his head. He was formerly the world's weight-lifting champion.

"My dear Mrs. Crocutt, may I put your name down for tickets to Prof. Pundit's course of lectures on Buddhism?" said the club chairman.

"You know how passionately I am of flowers?" replied the other woman, very much complimented.

Most Northerly Police Post Will Be Constructed Next Year On Ellesmere Island

The world's most northerly police post and also the most remote of any human habitation, is to be constructed next year for the Royal Canadian Mounted Police at the far end of Ellesmere Island. Building materials and two years' supplies have been cached in this easy reaching distance of the point. Three men will be detailed to patrol duty on the indescribably lonely shore of Rile Straits.

BARRE, SON OF KAZAN

A James Oliver Curwood

A LOVE EPIC OF THE FAR NORTH

Copyright, 1917, by Doubleday, Page & Co.
"BARRE, SON OF KAZAN," a Vitaphone Picture, With Color, the War Dog, is an Adaptation of This Story

SYNOPSIS

Bush McGattagart, the factor of Post Mountain, a brutal and unscrupulous schemer, was determined to marry Nepesee, the beautiful Indian "princess," daughter of Pierrot, the trapper. He had hired a motor, the slim Cree girl who had been his companion. McGattagart's advances were distasteful to Nepesee and aroused the enmity of her father, to the consternation of factor Pierrot, who wished to win with Nepesee, if necessary, to do with his daughter himself.

CHAPTER XII—Continued.

He checked again as he made his way through the darkness to the door. Nepesee as good as belonged to him. He would have her if it cost—Pierrot's life. And a why not? It was all so easy. And shot on a lonely trip here, a single knife-thrust, who would know? Who would guess where Pierrot had gone? And it would be all Pierrot's fault. Pierrot had last time he had seen Pierrot, he had made an honest proposition: he would marry Nepesee. Yes, even that. He had told Pierrot so. He had told Pierrot that when the latter was his father-in-law, he would pay him double price for furs.

And Pierrot had stared—had stared with that strange, stunned look in his face, like a man dazed by a blow from a club. And so it did not get Nepesee without trouble it would all be Pierrot's fault. To-morrow McGattagart would start again for the half-breed's canyon. And the next day Pierrot would have an answer for him. Bush McGattagart chuckled again when he went to bed.

Until the next to the last day Pierrot said nothing to Nepesee about what had passed between him and the factor. He said nothing. Then he told her. "He is a beast—a man-devil," he said, when he had finished. "I would rather see you out there with her head." And he pointed to the tall spruce under which the princess knelt.

Nepesee had not uttered a word. But her eyes had grown bigger and darker, and there was a flash in her cheeks which Pierrot had never seen before. She stood up when he had done, and she seemed taller to him. Never had she looked quite so much like a woman, and Pierrot's eyes were deep-shadowed with fear and uneasiness as he watched her. She moved off into the northwest toward Lac Baia.

She was wonderful, this slip of a girl-woman. Her beauty troubled him. He had seen the look in Bush McGattagart's eyes. He had heard the thrill

MRS. B. H. HART SICK FOR YEARS

Wants Women to Know How She Was Made Well by Lydia E. Pinkham's Vegetable Compound

Cornwall, Ontario.—"I am now giving your medicine a fair trial, and I am doing me good and am going to keep on taking it. I used to feel so tired in the morning that I didn't want to get up, but that feeling is leaving me now. I also sleep better and feel more like working. I have had seven or eight years of headache, tired feeling, and nervousness, and across my body. I read letters in the newspaper saying that good Lydia E. Pinkham's Vegetable Compound had done others. My husband and I quit soon, but I am not going to stop taking the Vegetable Compound and Lydia E. Pinkham's Blood Purifier till I am better and haven't an ache or a pain. Isn't that the right way? I have great faith in your medicines. They must be good when they take such results so quickly of them. I am recommending them to my friends. I have played many games from women asking about them."—Mrs. B. H. Hart, Box 101, Cornwall, Ontario.

Mrs. Hart wants to help other women and is willing to answer letters from sick women asking about the Vegetable Compound.

W. N. E. 1597

WRIGLEY'S
makes your food do you more good.

Now note it relieves that stuffy feeling after heavy eating. Swallows the breath, removes food particles from the teeth, gives new vigor to tired nerves. Comes to you fresh, clean and full-savored.

WRIGLEY'S
JEWEL CRISP
CHewing Gum

other moment or two of hesitation he darted upon his prey. McGattagart had heard no sound, for the snare into which Wapoo had run his head was the seat farthest from his neck; there was a sudden snap, a flash of his fire he sat with his back to a tree, smoking his black pipe and dreaming covetously of Nepesee, when Barre snatched at his night wand-pole. Barre no longer had the desire to hunt. He was too full. But he needed in and out of the snare place, enjoying immensely the stillness and the golden glow of the night. He was following a rabbit run when he came to a place where two fallen trees left a trail no wider than his body. He squeezed through; something tightened about his neck; there was a sudden snap, a flash of his fire he sat with his back to a tree, smoking his black pipe and dreaming covetously of Nepesee, when Barre snatched at his night wand-pole.

The yelp in his throat died in a gulp, and the next moment he was going through the pantomime actions of Wapoo, who was having his vengeance taken. For the life of him Barre could not keep from dancing about, while the wire grew tighter and tighter about his neck. When the snare caught at the wire and flung the weight of his body to the ground, the sapling would bend obligingly, and the life of the creek in which Wapoo lay for an instant completely off the earth. Furiously he struggled. It was a miracle that the fine wire held him. In a few moments more it must have broken—but McGattagart had heard him. The Factor caught up his rifle and a heavy stick as he hurried toward the snare. It was not a rabbit making those sounds—he knew that. Perhaps a rabbit—a fox, a young wolf.

It was the wolf he thought of first when he saw Barre at the end of the wire. He dropped the stick and rushed the club. If there had been clouds overhead, or the stars had been brilliant, Barre would have died as surely as Wapoo had died. With the club raised over his head McGattagart saw in time the white star, the white-tipped ear, and the jet black of Barre's coat.

With a swift movement he exchanged the club for the black stick. In that brief moment McGattagart had looked ahead to the days that were to come. He would have used the club.

CHAPTER XII.

Half an hour later Bush McGattagart's fire was burning brightly again. In the glow of it Barre lay transfixed up like an Indian papoose, tied in a balloon-shaped ball with hatches thrown. His head alone showing where his cap had cut a hole for it in the blanket. He was hopelessly caught—so completely imprisoned in the blanket that he could scarcely move a muscle of his body. A few feet away from him McGattagart was holding a bleeding hand in a basin of water. There was also a red streak down the side of McGattagart's bullet head.

"You little devil!" he snarled at Barre. "You little devil!" He reached over suddenly and gave Barre's head a vicious blow with his heavy hand.

"I ought to beat your brains out—and I believe I will!"

Raised Town Five Feet

Odd Engineering Feat Has Been Accomplished at Northwich, England

Shifting houses bodily several miles, and towns some yards along the level, has often been done, but raising a town five feet is something new. This is claimed to have been accomplished by the surveyor of Northwich, England, in just under three years. The entire business portion of Northwich, including ten streets, three banks, the county court and 200 stores and houses, have been raised to counteract the effect of subsidence caused by the brine pumping which proceeds continually in the salt mines under the town.

There has been no stoppage of business and only eight buildings, including an ancient inn, have had to be demolished because they could not be safely lifted.

In raising operations, parts of the lower brickwork were removed and small hydraulic jacks inserted. Chemicals' stores were lifted so carefully that not a bottle was disturbed. The town bridge was raised five feet at each end to bring it up to the new level of the town.

"DIAMOND DYES"

COLOR THINGS NEW

Just Dip to Tint or Boil to Dye

Each 15-cent package contains full directions so simple any woman can tint the soft, delicate shades of dye rich, permanent colors in ribbons, skirts, waists, dresses, coats, stockings, sweaters, draperies, coverings, hangings—everything! Try Diamond Dyes—no other kind—and tell your druggist whether the material you wish to color is wool or silk, or whether it is linen, cotton or mixed goods.

The Westward Flow Vancouver hopes to ship 100,000,000 bushels of this year's crop. This would double the city's previous record in grain shipments. Years ago Vancouver was not shipping a bushel of grain.

Other cities on the coast will participate in grain shipments as they acquire the necessary facilities. Thus has the Panama Canal and the weakening of the Orient changed the flow of commerce—Financial Post

MAKE CARE OF BABIES EASIER

Baby's Own Tablets Are a Great Help to Mothers of Young Children

Stomach disturbances and constipation are responsible for much of the trouble of babies. The modern mother does not resort to so-called "cures" of babies. She remedies trouble by sweetening the little stomach and giving a gentle laxative that does without grilling. Such a remedy is found in Baby's Own Tablets, easy to take and guaranteed to be free from opiates or narcotics.

Every mother who tries Baby's Own Tablets becomes enthusiastic about them. "Mrs. Anne Auger, Holyoke, Mass., says: 'I have used Baby's Own Tablets and think them a splendid medicine for constipation and other ailments which affect little ones. I have no hesitation in recommending them to other mothers.' Baby's Own Tablets are sold by medicine dealers or by the community's best friend, Dr. Williams' Medicine Co., Brockville, Ont. Write booklet, 'Care of the Baby in Health and Sickness,' will be sent free to any mother on request.

Many Rural Phones

According to the census report, there are two rural telephone subscribers to each square mile in the province of Saskatchewan, a situation which is found in only four states in the United States.

To have the children sound and healthy is the first care of a mother. They cannot be healthy if tormented with worms. Use Mother Graves' Worm Exterminator.

"Why were you so willing to send your wife back to her old home town for a visit?"

"Oh, I wanted her to get a good laugh at some of the men she had married."

A girl's features may be stamped on a man's heart, but it's her complexion that looms up in his coat collar.

You can't judge the size of a man's brains by the amount of noise he makes.

No Recipe For Longevity

Centenarian in England Has Never Had a Day's Illness

Not one single day's illness has been experienced by John Large, of Hampton-in-Arden, England, who has celebrated his hundredth birthday. He has no recipe for longevity. "With me," he confesses, "it's just happened, and I don't know how. Maybe it's because I never learned to smoke. Maybe it's because I've always made it a rule never to drink more than one glass of beer at once."

Mr. Large is one of twin, his brother living until he was 79. He started smoking at fourteen in London, whither he travelled by coach, and has been many things in his time, including stationmaster and farmer. Eight of his nine children are living, the eldest being 72 and the youngest 62. He says he can still "walk with his youngsters off their legs."

Propose Long Air Trip

Japanese Airmen Will Attempt a Flight to Hawaii

Civilian Japanese airmen will undertake a flight from Japan to Hawaii next year, according to the Japanese language newspaper, the Jiji Shimbun.

The paper printed a Tokyo dispatch which stated that the flight would be sponsored by the newspaper Manchu, on the occasion of its 20th anniversary. The Japanese army and navy look upon plans for the flight with favor. It was stated. Recently another Japanese war paper financed a Tokyo-Moscow flight.

Holloway's Corn Remover takes the corn out by the root. Try it and prove it.

Child Immigration

Commissioner Lamb Urges Canadians To Adopt English Children

Advocating the adoption by Canadians of young English children, Commissioner David Lamb, of the Salvation Army, in an interview in Toronto, stated that there was a great number of young children, perfectly healthy, whom England could send out to the Dominion.

Commissioner Lamb is in charge of the Salvation Army's immigration and social work all over the world, and he is touring Canada conferring with provincial governments in the interests of a greater influx of English people.

A Household Medicine—They that are acquainted with the sterling properties of Dr. Thomas' Electric Oil in the treatment of many ailments will not be without it in the house. It is truly a household necessity. It is effective in dealing with many ordinary complaints it is an inexpensive medicine. So, keep it at hand, as the call for it may come most unexpected.

An inn sign pointed on the blade-edge of a wheel to one of the blades of laughter, Suffolk.

Minard's Liniment for Sore Back.

Trade delays in London set back by a week the sale of more than \$2,000,000 a year, says F. O. Grisford, secretary of the Commercial Motor Vehicle Association.

The Right Way to Boil Potatoes

Put the potatoes in a **SMP** Stained Metal Pot. Cover with water. Add salt to taste. Boil until soft. When finished, drain off all the boiling water through the strainer spout. No danger of steam scalding the hands when the handle is turned. The cover locks the cover on. If your family uses potatoes, you require one of these.

SMP Enamelled POTATO POTS

Put the potatoes in a **SMP** Stained Metal Pot. Cover with water. Add salt to taste. Boil until soft. When finished, drain off all the boiling water through the strainer spout. No danger of steam scalding the hands when the handle is turned. The cover locks the cover on. If your family uses potatoes, you require one of these.

Children Cry for

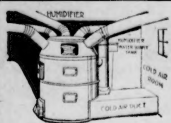

Fletcher's CASTORIA

MOTHER—Fletcher's Castoria is especially prepared to relieve infants in arms and children all ages of Constipation, Flatulency, Worms, Colic and Diarrhea; allaying the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

Overrichness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving natural sleep.

To avoid imitation, always look for the signature of **Fletcher's** Castoria. Absolutely Harmless—No Opium.

Physicians everywhere recommend it.

A FAR-FAMED FURNACE
is the McCarty, which not only heats, but ventilates at the same time, automatically mixing with the right amount of moisture to make it absolutely healthful. Will heat any room, in any part of the house, in any weather, no matter how the wind blows. Simple, economical and efficient.

Foolish Saving

A penny saved is not always a penny earned. Sometimes it is two pennies lost. The merchant who spends nothing on advertising loses much more than he saves.

The money spent for plate glass windows is not looked on as lost; nor is the money spent on better interior lighting.

Anything that increases the favor, that adds sales, that multiplies customers is very properly regarded as a good investment.

Advertising is a good investment—just as plate glass windows are. Advertising sells more goods to more persons than shop windows do.

A WORD TO THE PUBLIC

Do you resent having a merchant address his message to you in the form of an advertisement in our columns? On the contrary, is not your impulse to respond to his friendly overtures?

ELECTRIC MASSAGE

AND VAPOR BATHS

Conducted by a College Graduate

Have you ever experienced a dreadful pain in your back or muscles and did you wish to get rid of it quickly? Now you can. Our Turkish or Vapor Baths and Massages get results in rheumatism, lumbago, reducing, etc.

In our great little town Claresholm we have good doctors, dentists, hospital, respectable business houses, reliable business men, well said in every line. So why go to Calgary, or other places, when you can get what you want in your home town? And look, you are saving time and money. Not only that, but you are helping to build up greater progress and prosperity in your town and community; also greater personal respect. Deal in your home town and get the best attention.

Every business man and woman with sedentary occupation should at least take a Turkish or Vapor bath once a week, it would be invigorating and helpful to you. Wash the impurity out of the body, it's a good feeling to get rid of it, and the result will be better feelings for work and pleasure.

Ladies will be taken care of by lady assistant if they so wish.

Our Parlor is opposite the Rex Theater.

Hours 9-12, 1-5, and 7-8:30 evenings.

Consultation Free. No Drugs; No Back-breaking.

A. J. L. OLSON, Prop.
